MOTOROLA HT GP-328 PLUS

Compact, easy to use and versatile. With Motorola's™ smallest non-keypad professional radio, you will never be weighed down by your communication tools anymore.

- Motorola's special voice compression and low level expansion technology enable crisper, clearer and stronger audio quality, allowing you to keep communicating even in a noisy environment
- Motorola's Accelerated Life Test
- MIL-STD 810C, D and E

Signalling

Quick Call II, DTMF, limited MDC1200

Number of channels

4, 16

- Motorola's™ unique MDC signaling allows the transfer of data communications at the high-speed rate of 1200 bits per second
- The Forward error correction technology enables radio to receive message, like call alert and send out the PTT-ID even though the voice signal is too weak to be heard
- By pressing the emergency button in critical situations, the radio will emit a piercing alarm/siren; providing users with instant help alerts
- The GP328 Plus is intrinsically safe to operate in hazardous atmosphere certified by the US Factory Mutual standard
- Switchable RF Power Levels: with one button, users can switch between high and low power with reference to their specific application to conserve battery life
- Tri-colour LED battery gauge: indicates battery status with early warning on low battery strength
- Tone Tagging allows 8 different ringing tones to be assigned to 8 specific users or talkgroups making audio caller identification to these 8 groups possible
- The built-in voice-activated feature (VOX) enables users to transmit their message in a hands-free environment, without pressing the push-to-talk button
